Web Programming

Week 1 — Orientation & Introduction

INSTRUCTOR

Dr. Mukhiddin Toshpulatov

SCHEDULE

Mon A · Fri E · Fri E

CONTACT

muhiddin@gachon.ac.kr

STUDENT SURVEY

Let's start with you

TECHNICAL EXPERIENCE

- I have written HTML before
- I have used CSS before
- I have written JavaScript
- I have used VS Code or another code editor
- I have used Git or GitHub

SETUP & BACKGROUND

- I completed programming courses before this
- I have VS Code already installed
- I will bring my own laptop to class
- I have a GitHub account

COURSE OVERVIEW

What we build this semester

HTML

Structure

The skeleton of every page — headings, paragraphs, links, images, forms, tables.

Weeks 1–2

CSS

Appearance

Colors, fonts, layout (flexbox/grid), animations, and responsive design.

Week 3

JS

Behavior

Events, dynamic updates, API calls — what the page actually does.

Weeks 4–9

Final goal → a deployed web application your team builds and presents in Week 14.

COURSE FORMAT

How this class works

BEFORE CLASS

~25 min video

Watch on Cyber Campus.
Complete the short quiz.

IN CLASS

Code · Build · Fix

Hands-on practice,
team projects, discussion.

AFTER CLASS

Practice & Project

Reinforce concepts.
Build your team app.

Note — Even in flipped-learning weeks, at least 80% of class time is in-person. No session is replaced by video alone. All 15 weeks run in this classroom.

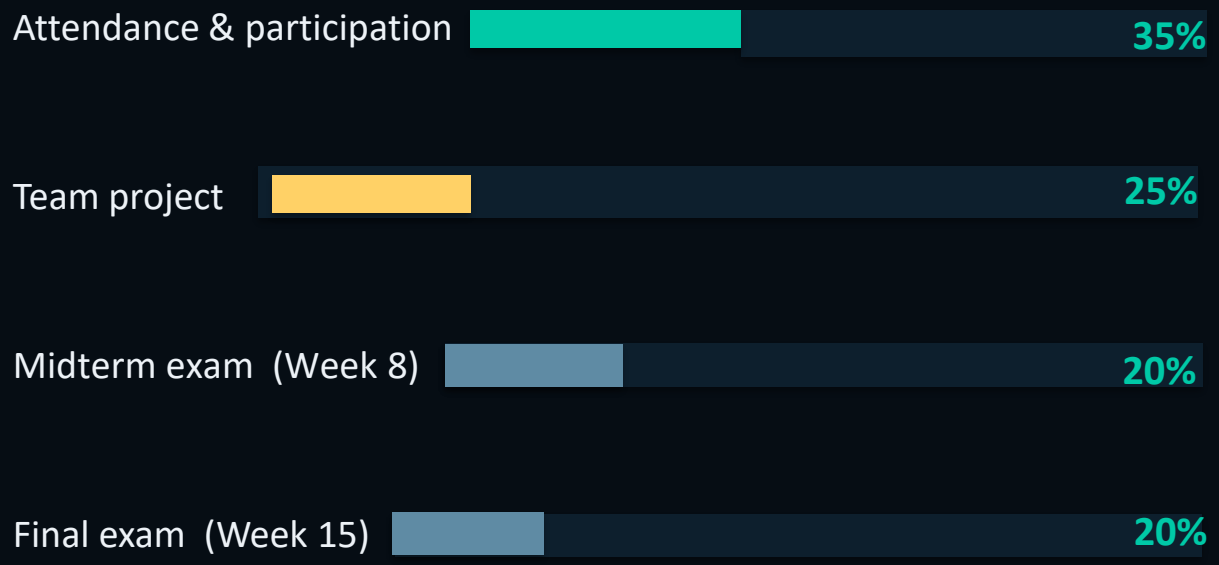

📼 Video attendance — 10% of your grade

📝 Pre-class quiz — 10% — done before arriving

🙋 In-class participation — 15% of your grade

ASSESSMENT

Your grade

Attendance = 35%

10% video · 10% quiz · 15% in-class participation

Team project = 25%

Groups of 3–4 · Submit Week 13 · Present Week 14

Late penalty

–10% per day late · Zero points after 3 days

Exams

Written/online individual exam

CLASS POLICY

House rules

- ✓ Watch the pre-class video before arriving — not during class
- ✓ Bring a laptop to every session (let me know if this is a problem)
- ✓ Missing 4 or more sessions = automatic F regardless of exam scores
- ✓ Late is better than absent — come in quietly and mark yourself late
- ✓ Office hours: Monday 15:00–18:00, AI공학관 520호, or email anytime
- ✗ Submitting AI output as your own work without understanding it = violation
- ✗ Sharing quiz answers or proxy attendance
- ✓ Using AI tools to help you code (Copilot, ChatGPT) is encouraged — in the syllabus
- ✓ Questions in English — clarity matters more than perfection

FUNDAMENTALS

How the web works

YOUR DEVICE

Browser (Client)

Chrome, Firefox, Safari
GET /index.html

re

SOMEWHERE IN THE WORLD

Web Server

Processes request
200 OK

H

BROWSER RENDERS

Web Page

Parsed, styled,
displayed to you

HTTP / HTTPS

The protocol (language) browser and server use. HTTPS = encrypted.

URL

The address of a resource — page, image, API endpoint, video.

DNS

Converts gachon.ac.kr into an IP address the server actually uses.

THE STACK

Three languages — one page

<HTML>

Content & Structure

Headings, paragraphs, links, images, forms, tables.

<h1> <p> <a href="…"> <img>

{CSS}

Presentation

Colors, fonts, spacing, layout, responsive design.

color: display: flex @media

JS()

Behavior

Click events, dynamic data, API calls.

addEventListener fetch() DOM

SETUP

Your toolkit

VS Code

Free code editor. Install the Live Server extension — saves a file, instantly refreshes your browser.
code.visualstudio.com → free download

Browser DevTools

Press F12 in Chrome or Firefox. Inspect HTML, live-edit CSS, see network requests — your debugging home base.

GitHub

Where your team project lives and gets deployed. Free account required. Create your account now.

Cyber Campus (LMS)

Pre-class videos, quizzes, and all submission portals. Check before every class.

- Eloquent JavaScript (3rd Edition) Marijn Haverbeke No Starch Press 2018
- You Don't Know JS: Up & Going Kyle Simpson O'Reilly Media 2015

IN-CLASS ACTIVITY · TODAY

Your first file

1 Install VS Code + the Live Server extension

2 Create a folder web-prog/week1/ on your laptop

3 Inside it, create a file called index.html

4 Type (don't paste) the skeleton shown → then add your name, country, and one fact

5 Click Go Live in VS Code — see it in your browser

6 Show the person next to you

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>My Page</title>
</head>
<body>

  <h1>Hello, I am ...</h1>
  <p>I am from ...</p>
  <p>One fact: ...</p>

</body>
</html>
```

BEFORE NEXT CLASS · WEEK 2

Before the next class

Watch: HTML Structure & Semantic Markup

Cyber Campus · ~25 minute video
Watch it before next class, not during.

Pre-class Quiz · 5 questions

Complete right after the video. Counts toward your 10% quiz grade.

Week 2 topics: HTML

Headings, paragraphs, links, images, lists, and semantic elements:
<header> <main> <article> <footer>

Questions?
